COPIER OPERATIONS DECEMBER 2015 TIP OF THE MONTH

RESET FUSER UNIT MESSAGE

When you get the error message on your screen "Reset Fuser Unit," this is what you should do.

Simply open the two big doors on the copier.
Look on the left side inside the copier for D2. Pull this drawer all the way out.
Firmly (not too hard) close the drawer.

Your machine will reset.

It might take a minute, but this will fix your problem and you will be ready to print. If this does not work, call me.
