

# MCPS Content Management System (Episerver) Training

# How to Add Images to Content

## In this document:

- a) How to upload images to the media tab in the asset pane
- b) How to insert images using the Epi editor
- c) Applying styles to an image

#### How to upload images to the media tab in the asset pane

For many block types, such as hero carousels and slideshows, you will need to resize your photos and upload them to the asset pane before adding them to the block

See *How to Log In and Set Up Your Work Area* for the basics on logging in and setting up your work area in Episerver.

 Click the folder button at the top right corner to open the content asset pane. (The asset pane is for content blocks, media, files, images and forms.)

2. Click the pin button (visible when the pane is open) to lock the asset pane in an open position.

- 3. Select the **Media tab** from the Assets pane.
- 4. Navigate to your School's folder. For example, Jones Lane ES would be under Schools -Elementary Schools - H-O - Jones Lane ES

5. Click **Upload Files** to browse for the file you wish to upload, or you can drag and drop a file into this area.

Opload files by dropping them here or click to browse
2017-18 Supply List.pdf

When the Upload Files window appears, click the + (plus) button to browse your files.
Upload Files

For This Site  $\rangle$  Schools  $\rangle$  Elementary Schools  $\rangle$  H-O  $\rangle$  joneslanees

7. Select the file(s) you wish to upload. A green status bar will show you when your file(s) have completed uploading. Click **Close** to close the Upload Files window.

*Next, you will need to add an Alt tag to the image for screen readers because federal law requires the MCPS website to be ADA compliant.* 

8. You will see the file(s) you uploaded in the asset pane. Click the menu option and select **Edit**.

9. Make sure you are in Properties view.

10. Enter a descriptive name for the image in the Alt field and click Publish.

How to insert images using the Epi editor

#### Step 2 – Insert the Image

- 1. Navigate to your school's folder in the Navigation Pane and select a page to edit
- 2. Select the button on the left for On-Page Editing. This display mode shows the page as it

appears on the site, using the template's layout and styles.

3. Select an active area to edit (when you hover over an active area, the border will turn green), or select an HTML block and click Edit. The rich text editor will appear.

- 4. Click in the text area where you want the image to appear.
- 5. Click the image icon in the rich text editor.
- 6. To select the image you uploaded to the Media tab on the Asset Pane, select the **General Tab** and click the source icon to browse for the image you want to insert.
- 7. Add an Image Description. This is required for ADA compliance and will be used in the alt tag for those using screen readers.

Insert/e	edit ima	ge						$\times$
General	Upload							
Source		/EPiServer/CMS/Content/siteassets/schools/el					ই	
Image description		students in classroom						
Dimension	IS	450	x	301	~	Constrai	in prop	ortions
						c	ok (	Cancel

- 8. Photos should be resized before uploading to Episerver to reduce the file size, but you can change the display size of the photo by entering a new pixel width in the **Dimensions** field. Check the box for **Constrain Proportions** and the height will be automatically determined for you.
- 9. Click OK.

## Applying Styles to an Image

- 1. Click the image. It should turn blue.
- 2. Click the Formats list.
- 3. Scroll down to Image Styles. You will see a list of options for styling your image.

- 4. Select Center-Align to center the image. Text will appear above or below.
- 5. To change the alignment or style the image differently, first clear the previous styles by selecting the image and clicking the **Clear Formatting** button.

- 6. Select Left- or Right- Align to "float" the image to the left or right and allow the text to flow around it.
- 7. Click Publish.
