Welcome to Outdoor Environmental Education Programs

We, the staff at Outdoor Environmental Education Programs, are committed to:

- providing outdoor learning experiences through the MCPS curriculum that increase students' content and process knowledge
- nurturing awareness, appreciation, and stewardship for the natural environment
- building the capacity of MCPS educators to teach environmental education using the outdoors as a classroom

Partnership with the Lathrop E. Smith Center for Environmental Education

The Smith Center frequently loans materials to Cedar Grove and has provided in-school field trips to support the curriculum.
