

Mission Statement

Our goal in second grade is to learn more and have fun. We are going to learn to do many new things. We will learn basic math facts, social studies and science, how to improve our spelling and reading comprehension, and work with technology. We will learn by practicing at home, listening to our teachers and friends, exercising self-control, and being responsible. We also would like to make new friends. Being polite, including people in activities, and being respectful will help us make and keep new friends. In school and at home we will always be responsible and respectful. We will always do our best.
